

# EXTRA *defence* with ultra-fresh\*

vertical | roller | roman | panel

## *ultra-fresh treated window blinds for* BUILT IN ANTIMICROBIAL PROTECTION

Keeping window blinds fresh and clean is of utmost importance and Louvolite offers an additional level of defence with the introduction of Ultra-Fresh treated fabrics. This antimicrobial treatment offers proven protection from microbial attack by controlling the growth of unwanted microbes.

When treated with Ultra-Fresh the fabric provides protection against the growth of odour causing bacteria, fungi, mildew and moulds. It also prevents stains that can be caused by bacteria and fungi resulting in fabric that is fresher and cleaner for longer.

Ultra-Fresh is recommended for use in the healthcare sector, care homes, catering facilities, schools, nurseries and within the home.

With a wide range of light filtering and blackout fabrics available it makes sense to choose window blinds treated with Ultra-fresh where antimicrobial protection is of particular importance.

clean  
& fresh

Ultra-Fresh treated window blind fabrics are easy to maintain and will preserve their antimicrobial properties even after cleaning. Perfect for bathrooms, food prep and serving areas like kitchens and canteens.

## INSIST ON ULTRA-FRESH TREATED WINDOW BLINDS

FABRIC	FABRIC WIDTH	FLAME RETARDANT	BLACKOUT	ROLLER	VERTICAL	ROMAN	PANEL	ULTRA-FRESH	POLLERGEN	SPC®	GREENSHIELD	WIPE CLEAN	MACHINE WASH (vertical only)

### ULTRA-FRESH\*

Treated with Ultra-Fresh for protection against the growth of odour causing bacteria and to preserve fabric freshness for longer.

\*Ultra-fresh is a registered trademark of Thomson Research Associates, Canada.

### POLLERGEN®

Pollergen® treated fabrics will de-nature up to 50% of pollen when the two come into contact, so a deployed blind can dramatically decrease the amount of active pollen that can enter a room.

### GREENSHIELD

Fabrics featuring Greenshield have been tested to confirm no harmful VOC's or hazardous substances will be released into the environment in quantities that are recognised as potentially dangerous to occupants of dwellings or buildings.

### FLAME RETARDANT

Meets the FR standard BS 5867 Part 2 Type B. Further information is available on request.

### SPC®

A Solar Protective Coating applied to the reverse of the fabric that reflects and filters light more effectively than conventional fabrics.
