Vision® blinds are an innovative window furnishing that feature two layers of translucent and opaque horizontal striped fabric that combine to create a striking modern feel.

The back layer moves independently of the front allowing the stripes to glide past each other creating an open and closed effect. This allows you to control the levels of light and privacy to suit your needs.

Natural and sumptuous tonal textures, subtle metallic shimmers and blackout fabric options make Vision® blinds perfect for any room in the home.

MAINTAIN THE VIEW

Vision® blinds are a striking, stylish and highly practical shading solution for the home. With distinctive horizontal stripes that gently filter and soften daylight whilst maintaining a view, they also offer you the option of both light and privacy.

CLOSED | PARTIAL VIEW

*Blackout fabric does not create a fully blackout blind, there will be lightstrike at the edge of the blind.

**controlled
view**

Easy to operate, a single control is used to slide the opaque and translucent woven stripes past each other. The same operation is used to raise or lower the window blind to any height in the window with ease, in the same way as the classic roller blind.

The front layer moves independently of the back allowing the stripes to glide between each other creating an open and closed effect, with limitless light control.

Sliding the fabric into a closed 'opaque-opaque' position allows full privacy and an impressive block of beautiful fabric at your window, whilst the 'translucent-opaque' position creates a stunning striped statement.

With Vision® blinds you will enjoy the very best in quality, manufacture and design, along with the practicality of a low maintenance window blind.
